The teaching profession always draws talented individuals who are interested to impart their knowledge among students. With a broader objective to impart knowledge and a passion to do a worthwhile job, teachers tread on the path to create the future citizens of the country. Teachers generally join the profession after finishing their bachelor degree in education. Their career prospects are however aligned to higher educational qualifications and experience. Many teachers after few years into their careers look for broader roles in their respective institutions. This is when they decide to take up further degrees. One of the most preferred degrees for practicing teachers is the Master of Science in Education. This degree equips them with the modern day teaching practices and helps them to implement latest teaching strategies in their classrooms. The program is very effective in helping the teachers to take up further responsibilities once they rejoin their profession after completing their program.

Since the degree is meant for practicing educators who are bound by time constraints, it is mostly delivered in online mode. The program is broadly divided into Curriculum and Instruction Strategies, Educational Leadership, Inclusion education and Literacy K-12. These subjects are essential concentrations in education profession. Apart from the concentrations there are core subjects which focus on the leadership skills of teachers, Differentiation Theories and Strategies, Motivational Theory and Classroom Management, Action Research and Case Study and finally Portfolio. To be successful in the program students have to complete 30 credits. The timeframe within which this course can be completed is approximately 18 months. On an average students have to spend 15-20 hours per week to complete the program with the timeframe. After completing the program students can expect to join in various administration roles in educational institutions. They will also be more effective in delivering their teaching sessions. Since the courses are delivered in an online mode, the students are supplied with well structured resources which help them to understand the subjects and clear the program.

If practicing teachers already have their Masters degree they can also opt for the Certificate of Advanced Graduate Study (CAGS). This degree is specially designed for enhancing the leadership abilities of Master teachers. Among the many Universities in the United States which offer these programs in the online mode, the University of New England is one of the most recognized ones. Over here students are exposed to one of the finest courses in higher education for practicing teachers. The programs at the University are accredited by the New England Association of Schools and Colleges Inc. which accredits educational institutions in 6 New England States. The University has a well experienced faculty and it was one of the early adopters of online education. The CAGS program was offered online from 1997. The course fee is \$375 per credit hour. The university helps students with financial aid and tuitions to enable them clear the education on-time. So, if you are having a thought that your teaching career is getting stuck at middle levels, it is time that you start thinking about the Master of Science in Education program.

The talented faculty and staff of the University of New England's online

Master of Science in Education program delivers the most up-to-date instruction on current practices for educators who want to reach the next level.
